PROFILE

Passionate Software Engineer based in Indonesia, specializing in building exceptional digital experiences. My journey in tech has equipped me with a versatile skill set spanning web, mobile, and backend development whether architecting a robust Laravel backend, designing a premium React frontend, or ensuring seamless background location tracking on Android, I thrive on turning complex requirements into elegant, maintainable solutions. I care deeply about clean code, user-centric design, and continuous learning.

EXPERIENCE

Software Developer

PT. Binav Maju Sejahtera

AUG 2022 – PRESENT

AVTS is Binav's vessel tracking system: it shows ships' live positions on a map. I build it, plus the AI tools and servers behind the company's internal systems.

- Built the AVTS app, streaming live vessel positions over WebSocket onto an interactive map with KML overlays
- Build AI systems that automate internal operational workflows
- Maintain the servers that keep these internal systems running

App Developer

Cetaphil

DEC 2024 – JAN 2026

Field app for Cetaphil's merchandising team, covering outlet visits, location checks and photo reports.

- Geofenced GPS tracking that confirms staff are at the outlet they report from
- Offline photo capture: high-resolution photos sync to the Laravel backend once the device is back online
- In-app dashboards and GPS maps of outlet coverage

App Developer

IGNICE

OCT 2024 – DEC 2024

Sales coverage reporting: which outlets are covered, and how each region is doing against its targets.

- Outlet coverage tracking modules for the mobile app
- Target-achievement dashboards for outlet and regional KPIs
- Automated, database-driven reports on regional distribution

Full Stack Developer (Intern)

PT Lauwba Techno Indonesia

JUN 2022 – SEP 2022

Full-stack web apprenticeship, building web applications end to end, from the database to the interface.

- Built full-stack web application features in PHP and Laravel
- Designed database schemas and integrated REST APIs

EDUCATION

Universitas AMIKOM Yogyakarta

Bachelor of Informatics (Undergraduate)

JUL 2023 – PRESENT

Computer Programming, Specific Applications.

SMKN 1 Bantul

Software Engineering (Rekayasa Perangkat Lunak)

2020 – 2023

SKILLS

FRONTEND

React · Vue.js · TypeScript · JavaScript · Tailwind CSS · Vite

BACKEND

Laravel · PHP · Go · Node.js · Python (Flask)

MOBILE & DESKTOP

Flutter · React Native · Electron

DATABASES

MySQL · PostgreSQL

CERTIFICATIONS

Dataslayer
Institut Teknologi Telkom Purwokerto
