PROFILE

Passionate Software Engineer based in Indonesia, specializing in building exceptional digital experiences. My journey in tech has equipped me with a versatile skill set spanning web, mobile, and backend development — whether architecting a robust Laravel backend, designing a premium React frontend, or ensuring seamless background location tracking on Android, I thrive on turning complex requirements into elegant, maintainable solutions. I care deeply about clean code, user-centric design, and continuous learning.

EXPERIENCE

Freelance Software Developer
PT. Binav Maju Sejahtera

AUG 2023 – PRESENT

Providing part-time freelance software development and technical expertise to build tailored, maintainable solutions across web and mobile platforms.

App Developer
Cetaphil

DEC 2024 – JAN 2026

Developed a robust mobile application focusing on high-performance dashboards, GPS mapping, coverage tracking, and remote field data synchronization.

App Developer
IGNICE

OCT 2024 – DEC 2024

Built application modules for outlet coverage tracking, dynamic target-achievement dashboards, and complex database-driven outlet reporting.

Full Stack Developer (Intern)
PT Lauwba Techno Indonesia

JUN 2022 – SEP 2022

Completed a comprehensive apprenticeship focused on robust web and application development, building cross-functional full-stack features.

EDUCATION

Universitas AMIKOM Yogyakarta
Bachelor of Informatics (Undergraduate)

JUL 2023 – PRESENT

Computer Programming, Specific Applications.

SMKN 1 Bantul
Software Engineering (Rekayasa Perangkat Lunak)

2020 – 2023
